

📖 Exercise

<

CSV files containing tax data by ZIP or postal code, allowing us to analyze income information in different parts of the country. We'll focus on a subset of the data, vt_tax_data_2, which has select tax statistics by ZIP code in

📄 Instructions

0 XP

script.py | solution.py

```
1 # Import pandas as pd
2 import pandas as pd
3
4
5 # Read the CSV and assign it to the variable data
6 data = pd.read_csv("vt_tax_data_2016.csv")
7
8 # View the first few lines of data
9 print(data.head(6))
10
```
